Profile

Computer Science Engineering graduate (2026) with a strong foundation in Java, Data Structures & Algorithms, Object-Oriented Programming, SQL, and DBMS. Hands-on experience building Java applications through academic and self-driven projects. Adept at applying OOP principles, Collections Framework, and file-based persistence to develop reliable, maintainable software. Eager to contribute to a high-performing team as a Java Developer while growing expertise in backend technologies.

Technical Skills

Programming Language: Java

Core Java: OOP (Encapsulation, Inheritance, Polymorphism, Abstraction), Collections Framework, Exception Handling, File Handling

Data Structures & Algorithms: Arrays, ArrayList, Strings, Binary Search, HashMap, HashSet, Sliding Window, Prefix Sum, Recursion

Database: SQL, MySQL, DBMS

Tools & Platforms: IntelliJ IDEA, VS Code, Git, GitHub

Currently Learning: Spring Boot, REST APIs

Education

B.S. Abdur Rahman Crescent Institute of Science and Technology

Chennai, India

B.Tech in Computer Science and Engineering — CGPA: 6.96

2022 – 2026

Krishnaswamy Vidyanikethan

India

Senior Secondary (Class XII) – Computer Science with Mathematics — 70.02%

2022

Krishnaswamy Vidyanikethan

India

Secondary School (Class X) — 67%

2020

Projects

Hospital Management System

Java, OOP, File Handling

- Designed and developed a Java-based Hospital Management System to manage patients, doctors, appointments, and billing records.
- Applied core OOP principles (Encapsulation, Inheritance, Polymorphism) to achieve modular and maintainable code architecture.
- Implemented full CRUD operations using Java File Handling for persistent data storage without an external database.
- Incorporated robust input validation and exception handling to ensure system reliability and graceful error recovery.

Job Portal Management System

Java, Spring Boot, MySQL, REST APIs

- Built a full-featured Job Portal application supporting separate workflows for recruiters and job seekers.
- Engineered RESTful APIs using Spring Boot for user registration, authentication, job posting, job search, and application management.
- Integrated MySQL as the backend data store using Spring Data JPA for efficient and scalable data persistence.
- Followed layered architecture (Controller, Service, Repository, Entity) to ensure clean separation of concerns and scalability.

Certification

- Java + DSA Decode 1.0** — Physics Wallah

Completed

Key Strengths

Problem Solving | Analytical Thinking | Quick Learner | Team Collaboration | Communication | Adaptability
